China YouTV's CnBoo Web Site Ranks No.1 on Google.com!

BEIJING, CHINA, Aug 17, 2007 (MARKET WIRE via COMTEX) -- China YouTV Corp. (OTCBB: CYTV), a publicly traded company that provides online video sharing services through its CnBoo web site in China, reported that CnBoo.com is currently ranked No.1 among all online video companies in China based on the world wide leading Internet search engine Google.com.

Google is a top web searching engine in all major global markets, offering targeted search results from more than 8 billion web pages. Today, Google.com has become the World's top one searching engine which offers search results in more than 35 languages and attracts an audience of more than 380 million people worldwide.

Coming on the heels of ranking No.1 on Microsoft Live Search Engine and No.7 on BaiDu (China's largest search engine), CnBoo is very proud to see its website now placing top position on all major searching engine websites in China.

According to the recent survey from IResearch, the audiences of online video website reach 86.72 million and account for 85.7% of total netizens in China by June 2007. Meanwhile, approximately 300 online video companies are sharing US\$80 million market nowadays. Moreover, it predicts that the users of online sharing service will be 180 million with the market size of US\$485 million by 2010 in China.

"All the revealed data made the ranking meaningful," said Mr. James Wei, the President of the Company. "Video sharing has a huge market in China. By the ranking, we are very pleased to see 'CnBoo' becomes comparatively popular website among the other companies in the same field. We believe we have the ideal formula to further our ambitions of becoming a leading online video sharing website in the industry."

About China YouTV Corporation:

The Company signed a Definitive Agreement with HuaJu to set up a Joint Venture in China on March 16, 2007. According to the Agreement, the China YouTV Corp. owns 51% of the joint venture company and will provide the required working capital for the Joint Venture. HuaJu will be in charge of the daily operation of the Joint Venture. HuaJu has agreed to conduct its video sharing business only through the Joint Venture, and has agreed to contribute its web site, www.CnBoo.com and customer contracts to the Joint Venture www.CnBoo.com ("CnBoo") is the online video site belonging to the Joint Venture established by China YouTV Corp. and HuaJu. It is a video viewing site and social networking site that allows users to create their own profiles, post videos, and comment on each other's posts. The CnBoo web site is similar to YouTube (www.YouTube.com), the No. 1 online video site in operation. Within less than 2 years, CnBoo already has over 1.2 million members and over 2 million pieces of original digital video (DV) shorts.

To increase membership and CnBoo's brand name awareness, HuaJu has worked both on-line and off-line:

On-line: HuaJu has signed several agreements to enhance its on-line contents, such as an agreement for CCTV's TV program "Exploring High and Low", an agreement with ManGoCity, a travel company, an agreement with Megadia to host Humor channel on CnBoo web site, and the recently signed agreement with Music Nation and VVsky to add more music on its web site.

Off-line: HuaJu has signed several agreements to promote its 3G space cards, such as the agreement with Gome Electrical Appliances Holding Ltd., the largest chain store operator of electrical appliances in China to distribute its 3G digital space cards to Gome customers; an agreement with HURRAY, a NASDAQ listed company, for the launch of 3G experience terminals in Gome's stores; an agreement with ManGoCity, and a promotion agreement with Z-Card. HuaJu also got exclusive right from AIDS Prevention Education Project for Chinese Youth to negotiate with investors to install LED displays in the colleges and universities across China. All LEDs will have HuaJu and CnBoo's logo on it.

The Company has shown increasing popularity as its CnBoo web sites had been ranked No.1 on Microsoft Live, No.7 on BaiDu, No.11 on Yahoo China and No.12 on Google China when searching for keywords: on-line video and on-line video sharing web sites.

The Company has changed its name to China YouTV this year to reflect its new business operations: the fast growing video sharing web site market in China.

YouTube.com opened in November of 2006, it is one of the most viewed websites in the world. Its market influence has partnered it with the world's largest media corporations. Google purchased it for over \$1.6 Billion. Chboo.com is well on the way down the same road. This is a chance to get ahead, with a proven method of success.

Read the news, move fast on CYTV First thing Monday, August 20, 2007!

We have some american style joke about such decisions.

And using free operating system will provide some money for this support too!

So the answer is "no".

In your MacOS X dock you can have an application running natively in windows!
and now i didn't see any more or less good reason to maintain it.

There are very few viruses for Linux, compared to Windows, so actually it is not a big problem.

All in all, Revit and ArchiCAD are comparable: they have the same goal and are more or less capable of the same things, but do it in a quite different way.

If you're going to correct someone's English, it is helpful to know it first.
they almost lost their domination position.

Is there a email address where i can reach somebody at Graphisoft that could be of some help?

The information and productivity gained from modeling is made clear when editing

or refining design and in the resulting accuracy of construction documentation.

And using free operating system will provide some money for this support too!

Big architectural firms.

even wo manufacture support.

they almost lost their domination position.

I use outside IT support for taking care of my antivirus software at the moment so nothing will change.

There are several on the market.

I don't think that he can or want switch his workplace to linux in any situation

But also he don't want to switch to ArchiCAD.

So the answer is "no".

They stop produce their own OS - IRIX.

And using free operating system will provide some money for this support too!

hmm, don't know, let say .

EXE software to platform indepentend WWW software isn't that big in the rest of the world like here in Sweden?

Think of it as SmartModernCAD.

And make step in future.

People who are not interested in having AC for LINUX please do not vote in this poll.

oh, I have not heard such kind words of appreciation for a long time.

I don't think that he can or want switch his workplace to linux in any situation

But also he don't want to switch to ArchiCAD.

They don't want to move there ass from chair.

The answer is: nobody, until you tell them, and then, it is love for connesseurs

.

and now i didn't see any more or less good reason to maintain it.

Thank you for your good work on this, Rob.

Think of it as StupidOldFashionedCAD.

There are several on the market.

But maybe the big conversation from Windows .

Windows is remarably unstable so the cost for IT support will decrease dramatic ally once the machines are configured at the beginning.

New systems deliver with linux, sun go open source with solarise, BSD - freeBSD, where is SCO with help of microsoft's money?

But who can say about next month?

How long old architects will work.

I just want to know how you got hell past the censors.

The answer is: nobody, until you tell them, and then, it is love for connesseurs

.

are you can canulate at all?

It seems easier to carry a spare pair of glasses than to lug around a bigger lap top.

You lost your historical proud.

I'm have really poor english.

I am very passionate about the program and have proven the program s abilities t o so many people.

It seems easier to carry a spare pair of glasses than to lug around a bigger lap top.

But why bother to combine features since AutoCAD is not modern?

The drivers problem is much greater with Vista, so nothing new!

But why bother to combine features since AutoCAD is not modern?

Anything else that is even possibly off color gets whacked and hell gets through ?

To sit farther from your laptop?

Not that I'm complaining.

I just want to know how you got hell past the censors.

Thank you for your good work on this, Rob.

Simply increasing resolution on a small screen always makes graphics hard to rea

d for me.

And the word "spelt" is spelled "spelled".

I am very passionate about the program and have proven the program's abilities to so many people.

and suggest to their customers switch to linux.

"Who the hell is using" .

are you can calculate at all?

AutoCAD is an electronic drafting board adaptable to any drafting situation.

PS I want add some about pro of linux OS.

All applications make buildings to one degree or another, even basic Crayon on the back of an envelope CAD will do.

You europeans why you take such position?

What trouble that was!

You europeans why you take such position?

I was just doing some research understanding on ArchiCAD, AutoCAD and any other CAD programs where the architects are using.

AutoCAD is still widely used today.

All I need to migrate to Linux is AC, Photoshop and some decent rendering software, preferably V-Ray compatible.

Windows is remarkably unstable so the cost for IT support will decrease dramatically once the machines are configured at the beginning.

I need some help regarding the Certificate matter.

I want it for more real estate.

"Who the hell is using" .

Windows is remarkably unstable so the cost for IT support will decrease dramatically once the machines are configured at the beginning.

Without speaking a bad, five letter word, there are outrageous cabbage-kicking claims by other, lesser programs with immense development money behind them, but ArchiCAD leads right now.

Intuos Graphire for example.

Big architectural firms.

Thank you for your good work on this, Rob.

that made my morning.

Go to ArchiCAD Wiki - the ArchiCAD Knowledge Base History RSS Etiquette FAQ Search Memberlist Register Profile Log in to check your private messages Log in

Not that I'm complaining.

Hypersonic, HP HDX and Voodoo, Seger, etc.

The drivers problem is much greater with Vista, so nothing new!

hmm, don't know, let say .

And make step in future.

This poll is to kind of compare apples with apples in terms of professions, try to be honest fellas.

Thank you for your good work on this, Rob.

are you can calculate at all?

There's no faking it in ArchiCAD.

To sit farther from your laptop?

EXE software to platform independent WWW software isn't that big in the rest of the world like here in Sweden?

In your MacOS X dock you can have an application running natively in windows!

Very clever of you to get me to write your essay.

Can stay in the MacOSX environment the whole time!

if you selected 'Other' please specify.

Think of it as StupidOldFashionedCAD.

To sit farther from your laptop?

Most of all in my post is joke.

Besides, here most of the servers run under Linux or Unix, so it will actually b

e easier to migrate!

We live in interesting times as far as architectural software goes.

It sounds very contradictory so in case of any liability for posting this I can not be held liable unless I could.

PS I'm sorry If I use some words that have more than one sence.

Intuos Graphire for example.

Intuos Graphire for example.

Not that I'm complaining.

I just want to know how you got hell past the censors.

You lost your historical proud.

They don't want to move there ass from chair.

AutoCAD is still widely used today.

Thank you for your good work on this, Rob.

AutoCad is an electronic drafting board adaptable to any drafting situation.

The new Macs have an option for an even higher res.

ANYONE Before you cast your vote please consider this.

Windows is remarcably unstable so the cost for IT support will decrease dramatic ally once the machines are configured at the beginning.

are you can canulate at all?

AutoCAD is still widely used today.

they almost lost their domination position.

To sit farther from your laptop?

Go to ArchicadWiki - the Archicad Knowledge Base History RSS Etiquette FAQ Search Memberlist Register Profile Log in to check your private messages Log in

Or do you need to boot into Windows to have that supported?

The answer is: nobody, until you tell them, and then, it is love for connesseurs

People who are not interested in having AC for LINUX please do not vote in this poll.

are you can canulate at all?

Personally I have never seen using LINUX in an architectural practice.

Without speaking a bad, five letter word, there are outrageous cabbage-kicking claims by other, lesser programs with immense develoment money behind them, but Archicad leads right now.

I want it for more real estate.

I told earlier that I didn't think that GS make Linux version.

They don't want to move there ass from chair.

AutoCAD is still widely used today.

Spend more on 'Parallels' or 'Fusion'.

that made my morning.

Spend more on 'Parallels' or 'Fusion'.

If you are going to market to architects, you need buzzwords providing solace to archaic AutoCAD feifdom managers and techologic hope to those needing modern building descriptors.

But problem of how you tricky calculate is actual.

But as it is talked in Odessa - in every joke only part of joke.

All in all, Revit and ArchiCAD are comparable: they have the same goal and are more or less capable of the same things, but do it in a quite different way.

PS I want add some about pro of linux OS.

Big architectural firms.

Think of it as StupidOldFashionedCAD.

Think of it as StupidOldFashionedCAD.

Windows is remarcably unstable so the cost for IT support will decrease dramatic ally once the machines are configured at the beginning.

People who are not interested in having AC for LINUX please do not vote in this poll.

And make step in future.

You lost your historical proud.

There are very few viruses for Linux, compared to Windows, so actually it is not a big problem.

But there are many who want to migrate to Linux, forget Windows and find Mac too expensive!

There's no faking it in Archicad.

So can I say the main common cad programs most architects used are archicad right at the moment?

I was just doing some research understanding on archicad, autocad and any other cad programs where the architects are using.

I'm have really poor english.

I'm have really poor english.

But problem of how you tricky calculate is actual.

Not that I'm complaining.

Apple provides "boot camp".

Besides, here most of the servers run under Linux or Unix, so it will actually be easier to migrate!

Because there are no architectural applications for Linux!

Personally I have never seen using LINUX in an architectural practice.
