yocto PROJECT Toaster   All builds   All projects   New project   Manual

Peanuts ✏

Builds (0)   Configuration   Import layer

① When you start the first project build, the 'Builds' counter remains at '0' (until the build finishes).

Type the recipe you want to build   **Build** ❓

Latest project builds

② We show the "Latest project builds" section, but not the all builds one. That one only appears when the build finishes.

core-image-clutter   Build queued ❓   Cancel
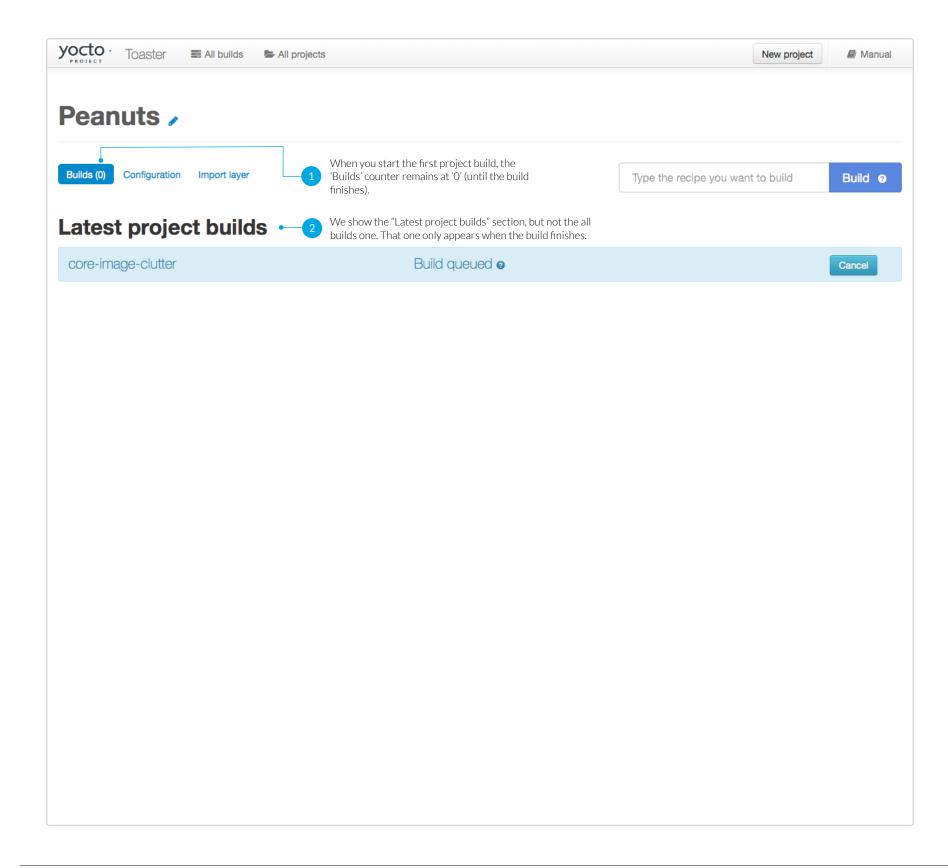

First project build

When you start your first project build, this is what happens:

1. We bring you to the Builds tab as usual: the counter in the tab remains at '0', since it counts only completed builds, not builds in progress.

2. We show the 'Latest project builds' heading and fade in the 'build queued' notification. Note that the 'All project builds' section does not show, since there are no completed builds yet.

To see it, visit:

http://www.yoctoproject.org/toaster/project-new-configuration.html

Type something in the build form on the top right hand corner of the page and click 'Build'.
